

Boiled Peanuts

Saturday, June 15, 2024 17:56

Ingredients

- 2 pounds **raw peanuts** *in shells (or green peanuts)*
- 1/3 cup **kosher salt**
- 3 tablespoons **cajun seasoning** *(or creole seasoning)*
- 1-3 teaspoons **crushed red pepper**
- 1 1/2 teaspoons **liquid smoke**
- 1 teaspoon **garlic powder**
- 4+ quarts **water**
- ADDITIONAL FLAVOR IDEAS:
 - 1-2 Poblano Peppers
 - 1-2 Red/Green/Yellow Peppers
 - Chicken Broth/Bullion for the Boil
 - 3 jalapeños sliced
 - 2 dill pickles sliced
 - 7 oz. jar of green olives with juice
 - 12 ounce jar green pickled jalapeno peppers with carrots, (this gives flavor without a lot of heat)

Instructions

INSTANT POT BOILED PEANUTS: (77-93 Minutes)

- Place the peanuts in a 6 or 8 quart **Instant Pot**. Add the salt, cajun seasoning, crushed red pepper, liquid smoke, and garlic powder. Pour in 4 quarts water... Or enough to cover the peanuts when you push them down.
- Lock the lid into place. Set on **Pressure Cook High** for **77 minutes for green** peanuts or **93 minutes for raw** peanuts. Once the timer goes off, perform a natural release. Once the steam button drops it's safe to open the Instant Pot.

STOVETOP BOILED PEANUTS: (2-8 Hours)

- Place a large 6-8 quart Dutch oven over high heat. Add the peanuts, salt, Cajun seasoning, crushed red pepper, liquid smoke, and garlic powder. Pour in 4+ quarts of water, or enough to cover the peanuts when they are pushed down.
- Cover the pot and bring to a boil. Once boiling, stir well, then lower the heat to a mild simmer. Cover and cook for **2-3 hours for green** peanuts or **6-8 hours for raw** peanuts. Check the water level every hour and add warm tap water if needed.

CROCK POT BOILED PEANUTS: (22-38 Hours)

- **Set out a large 6+ quart crock pot. Add the peanuts, salt, cajun seasoning, crushed red pepper, liquid smoke, and garlic powder. Pour in 3-4 quarts water, or enough to cover the peanuts when they are pressed down.**
- Cover the crock pot and set on **low**. Cook for **22-24 hours for green** peanuts, and **36-38 hours for raw** peanuts. Add water every 8 hours if needed.

Directions for Making Canned Boiled Peanuts

Step 1 - Select your peanuts

Select fully mature, but still green peanuts. They must not be roasted or already cooked or dried. Fully mature peanuts do not make good quality boiled peanuts; rather raw or "green" ones are used. "Raw" denotes peanuts in a semi-mature state, having achieved full size, but not being fully dried, as would be needed for roasting or peanut butter use. The most flavorful peanuts for boiling are the Valencia type. These are preferred in the United States, being grown in gardens and small patches throughout the South. Green Virginia type peanuts are also sometimes used - these do have larger kernels, but the flavor is not as good.

Step 2 - Prepare the jars and pressure canner

Wash the jars and lids

This is a good time to get the jars ready! The dishwasher is fine for the jars; especially if it has a "sanitize" cycle. Otherwise put the jars in boiling water for 10 minutes. I just put the lids in a small pot of almost boiling water for 5 minutes, and use the magnetic "lid lifter wand" (available from target, other big box stores, and often grocery stores; and available online - see this page) to pull them out.

Get a large pot of water boiling

We will use this water to pour over the peanuts and fill each jar with liquid, after we've packed them full of peanuts. I use the largest pot I have, so that there is plenty of clean, boiling water ready when I need it.

Get the pressure canner heating up

Rinse out your pressure canner, put the rack plate in the bottom, and fill it to a depth of 4 inches with hot tap water. (of course, follow the instruction that came with the canner, if they are different). Put it on the stove over low heat, with the lid OFF of it, just to get it heating up for later on.

Step 3 -Wash the peanuts

Wash them under running water.

Step 4 - Soak the peanuts

Soak the peanuts in the shell in fresh water for one hour.

Step 5 - Soak again

Discard the water, cover again with fresh water and soak for another hour.

Step 6 - Soak a third time!

Repeat this soaking process one more time for one more hour. This makes a total soaking time of three hours, using fresh water each time.

Step 7 - Make a brine solution

Combine 1 cup of pickling salt or kosher salt with 1 gallon of water. Set this on a burner on low heat (so it does not boil away) until you are

Ingredients

- 1 ¼ lb green peanuts
- ½ cup table salt
- 6 cups water
- ¼ cup Cajun seasoning or Creole seasoning Cajun will be spicier!
- 1 teaspoon red pepper flakes
- 1 teaspoon garlic powder

Instructions

- Thoroughly rinse off the green peanuts with water and throw out any peanuts that are mushy. Place all ingredients in the insert of the Instant Pot. Close the lid, and set the steam release valve to sealing/sealed.
- Cook on high pressure for 1 hour.
- After the hour is up, let the peanuts sit in the pot as the pressure releases naturally for 25-30 minutes. Do not open the sealing valve during this time. Once the pressure indicator drops, open the lid.
- You can eat the peanuts hot (my preference!) or you can chill them in the fridge and eat them cold.
- Serve and store them in the liquid they cooked in. They will keep for up to a week in a covered container.

Ingredients

- ½ lbs. raw peanuts in shells
- 3 jalapeños sliced
- 2 dill pickles sliced
- 7 oz. jar of green olives with juice
- ½ cup creole seasoning
- 2 cups dill pickle juice
- 6 cups chicken broth or water

Instructions

- Thoroughly wash raw peanuts under running water. You may want to let them soak for a while to loosen any extra dirt.
- Add peanuts to an empty pot. Then add jalapenos, pickles, and olives to pot. DO NOT STIR.
- Add creole seasoning, pickle juice, and chicken broth. Again, DO NOT STIR. We want all the peanuts to remain submerged. And if you stir them, they will all float to the top.
- Lock lid and cook at high pressure for 120 minutes.
- Once cook time is complete, allow pressure to release naturally. Then let the peanuts sit for as long as you can stand it! I've made these several times and recommend cooking them at night and letting them sit overnight.

...ready to fill the jars (Step 10)

Step 8 - Parboil the peanuts

Then parboil the peanuts for 10 minutes in fresh water and drain. Parboiling means to maintain the stove's burner so that the water is simmering, just below boiling. This can be done inside on the stove or outside on a propane burner for a larger volume. The boil can go on longer than 10 minutes, depending on quantity and the age of the peanut (green "raw" peanuts cook faster and tend to be better tasting), but you do not want to boil so long that the peanuts become peanut butter! When they are soft, they are done. If they are still slightly crunchy, they are not done yet.

Flavorings such as spices, hot sauce or Cajun seasonings can be added to the boil.

Step 9 - Fill the jars

Pack the hot peanuts into hot jars, leaving 1/2 inch headspace.

Step 10 - Add the hot brine

Fill each jar to 1/2 inch from the top with boiling brine (1 cup salt per gallon of water). Remove any air bubbles.

Step 11 - Seal the jars and fill the canner

Wipe the jar's rims, put the lids on then the rings and tighten them snugly. Place the jars into the pressure canner.

Step 12 - Let the pressure canner vent steam for 10 minutes

You MUST use a [Pressure Canner](#). Peanuts are a non-acidic food. Put the heat on high and let the steam escape through the vent for 10 minutes to purge the airspace inside the canner.

Step 13 - Put the weight on and let the pressure build

After 10 minutes of venting, put the weight on and close any openings to allow the pressure to build to 11 pounds (see the charts below for different canners).
