

Cornbread

Friday, September 6, 2024 11:10 AM

Dry Ingredients (mix together)

5oz Cornmeal
5oz Flour
1/2 tsp Baking Powder
1/2 tsp Baking Soda
1 tsp Salt
1/2 tsp Cayenne Pepper
4 oz Sharp Cheddar (**mix other ingredients then mix in the cheddar**)

Wet Ingredients (mix in food processor)

1/2 C Corn Kernal's
1 1/2 C Buttermilk
2 Tbsp Honey
1 cored and quartered Jalapeno Pepper

Mix above first then add in

2 large eggs
1/2 C butter **melted and cooled so you don't cook the eggs**

1. Mix wet and dry ingredients together lightly by hand so the gluten in the flour doesn't make the cornbread too chewy.
*The batter will be thick
2. Pour into pan (cast iron or baking pan greased well) and top with jalapeno slices and optionally rosemary
3. Cook at 425° for 20 to 25 minutes - test with toothpick
4. Let cool for 5 minutes and brush top with honey and sprinkle with sea salt
