## NATTO (Fermented Soy Beans)

- Soak 1 lb Soy Beans for 12 to 24 hours  
(clean first) - bad beans + Rinse
  - When Done Remove any bean skins or bad beans
  - Add Beans to Instant Pot + cover w/ water - 1" over
  - Cook for 20 min on bean setting
  - Sterilize All tools - Big Bowl - Small ~~bowl~~ - Strainer - Spoon
  - To small bowl add 1 spoon (the small one) of spores  
to that add two teaspoons of sterilized water (Hot)
  - Strain Beans and add to the big bowl
  - Add Natto starter + mix well
  - Place beans back into instant pot (level out)
  - Set IP to ~~pressure~~ setting for 24 hours (Temp needs to stay 90°-104°)  
Cover w/ Towel + glass lip
  - Once done transfer to Steril storage + age 5 days
- Use glass bowl in Instant Pot covered w/ Plastic Wrap  
WRAP TOP OF IP also Poke Holes + feeding in both
