

Salt & Vinegar Salt

Wednesday, October 23, 2024

10:58 AM

1/2 Cup Baking Soda

2 Liters of White Vinegar

Combine and allow to foam and bubble until it stops

Heat on high heat stirring frequently. Reduce down to 10ml or by about 1/10th. be sure to scrape down as much powder from the sides that you can.

Set oven to 200° and place tray in and allow all liquid to evaporate. Once cool scrape out the powder into a mortar and pestle and grind into a fine powder adding about a tablespoon of salt.

1 Gallon Vinegar

190 G Baking Soda

add to BS to Vin and allow to fizz out and then

Simmer on low for 1 hour. After the hour turn heat to high and reduce down by about 60 to 80%

Place in glass baking dish in oven at 200° until all water is gone.

What you have now is Sodium Acetate Trihydrate.

Grind into a fine powder

30g Salt

30g Citric Acid

20g Corn Starch

Mix all together and place into the bottom of a pan

500 ml Vinegar

500 ml vinegar

1/4 Cup Baking Soda

Mix and let foam

Boil until you have a clear liquid
reduce to about half or more

Bake at 200° until all water has evaporated

grind in mortar and pestle into a fine powder
